one pocket being defined in part by at least one of the first and second interior covers.

Claim 6 (Withdrawn): A wallet according to claim 1, wherein the money clip is hinged.

Claim 7 (Original): A wallet according to claim 1, wherein the money clip is not hinged.

Claim 8 (Original): A wallet according to claim 1, wherein the portion of the money clip is biased against the second exterior surface.

Claim 9 (Canceled)

Claim 10 (Currently amended): A wallet sized for stowing in a pocket of a wearing apparel, the wallet comprising:

first and second exterior covers defining first and second exterior surfaces, respectively, the first and second exterior surfaces facing in opposite directions;

at least one pocket within an interior of the wallet and sized for storing

credit cards;

a wristwatch on the first exterior surface and equipped with laterally-opposite posts configured for securing a wristband thereto, the wristwatch being secured to the first exterior surface by portions of the first exterior cover that overlay the posts, the portions being aligned on the first exterior surface at opposite ends of the watch; and

a money clip attached to the second exterior surface, the money clip extending in a direction parallel to the alignment of the portions of the first exterior cover and having a portion roughly parallel to the plane of the second exterior surface and biased in a direction toward the second exterior cover so as to be capable of securing paper money therebetween;

wherein the wristwatch, the portions of the first exterior cover, and the money clip are aligned in the same direction and oriented and sized so as not to impede with stowing the wallet in the pocket of the wearing apparel.

Claim 11 (Withdrawn): A wallet according to claim 10, wherein the wallet is a non-folding wallet and the at least one pocket is between the first and second exterior covers of the wallet and defined by the first and second exterior covers and at least one interior wall parallel to and between the first and second exterior covers.

interior surfaces facing each other when the folding wallet is folded at the fold;

at least one interior wall defining at least one pocket between at least one of the first and second interior and exterior cover portions of the folding wallet, the pocket being sized for storing credit cards;

a wristwatch on the first exterior surface and equipped with laterally-opposite posts configured for securing a wristband thereto, the wristwatch being secured to the first exterior surface by portions of the first exterior cover portion that overlay the posts, the portions being aligned on the first exterior surface at opposite ends of the watch; and

a money clip attached to the second exterior surface, the money clip extending in a direction parallel to the alignment of the portions of the first exterior cover and having a portion roughly parallel to the plane of the second exterior surface and biased against the second exterior cover portion so as to be capable of securing paper money therebetween;

wherein the wristwatch, the portions of the first exterior cover, and the money clip are aligned in the same direction and oriented and sized so as not to impede with stowing the folding wallet in the pocket of the wearing apparel.

Claim 15 (New): A wallet according to claim 1, wherein the wallet has a length and a width shorter than the length, and the money clip and the
